

**Supplementary Table I.** Formulas used in calculating indexes

NLR	$\frac{\text{neutrophil count}}{\text{lymphocyte count}}$
PLR	$\frac{\text{platelet count}}{\text{lymphocyte count}}$
SII	$\frac{\text{neutrophil} \times \text{platelet count}}{\text{lymphocyte count}}$
IDI	$\frac{\text{neutrophil count}}{\text{lymphocyte count} + \text{monocyte count}}$
PCT	$\frac{\text{platelet count} \times \text{mean platelet volume}}{10,000}$
LMR	$\frac{\text{lymphocyte count}}{\text{monocyte count}}$

NLR, neutrophil to lymphocyte ratio; PLR, platelet to lymphocyte ratio; SII, systemic immune inflammatory index; IDI, infection discrimination index; PCT, plateletcrit; LMR, lymphocyte to monocyte ratio
