

**Supplementary Material: Box 5.** In-hospital: Resource appropriate trauma tool for initial evaluation

Key elements:

- How will a major trauma be identified & by whom? What triage tool will be utilized?
- Defined methodology *i.e.*, protocols for each body region that are resource appropriate

Measures of compliance:

- What percentage of times a patient meeting major trauma criteria had the trauma tool administered & recorded?

Measure of impact:

- Missed injury rate, how to measure will need to be defined
- Change in risk adjusted outcomes, how to measure will need to be defined
