

**Supplementary Table VI.** Association of HCMV infection in cord blood and neonatal saliva with adverse pregnancy outcome (APO)

	Without BOH group	BOH group
Saliva PCR positive and Cord blood positive and APO=61% (11/18)	50% (6/12)	83% (5/6)
Saliva PCR negative and Cord blood negative and APO=44% (15/34)	53% (8/15)	32% (6/19)
<i>P</i> value	>0.9999	0.0561

Comparisons between groups was evaluated by Fisher's exact test.  $P < 0.05$  was considered significant
