

Supplementary Table. The peptides were 15-mers overlapping with 11 amino acids, covering the S1 domain of the spike S1 protein (amino acid 13-685). The mean purity of the synthetic peptides was 80 per cent. The pool was supplied in two vials

SARS-CoV-2 peptide pools	Amino acids
Pool 1 SARS-CoV-2 S1 peptides	1-83 (83 peptides)
Pool 2 SARS-CoV-2 S1 peptides	84-166 (83 peptides)
